SUMMARY

Detail-oriented and enthusiastic BCA graduate seeking an entry-level Data Analyst position. Proficient in Python, SQL, Excel, Pandas, NumPy, and Power BI with hands-on experience in data analytics projects. Strong ability to analyze datasets, identify trends, and present insights through interactive dashboards and reports.

EDUCATION

(VNSGU)Veer Narmad South Gujarat University

College : Shree S.v. Patel College

Gujarat(Surat), India

Degree : Bachelor of Computer Application

2023 Jun – 2026 Apr

- Among the top 20% of the batch:
- Python Programming
- Exploratory Data Analysis (EDA)
- Database Management Systems
- Web Designing

SKILLS

Experience : Fresher

Technical : SQL, Python, Pandas, NumPy, Matplotlib, Seaborn

Tools : Power BI, Excel, Jupyter Notebook, Google sheet

EXPERIENCE

Data Entry Operator

Youth Vidhyakul

- Entered and updated data accurately on the company website, ensuring data integrity and consistency.
- Cleaned and organized data in Microsoft Word documents, correcting formatting errors and standardizing records.
- Managed and maintained Excel spreadsheets, performing data validation, deduplication, and basic analysis.
- Coordinated with team members to ensure timely completion of data entry tasks with high accuracy.

PROJECTS

Diwali_Sales_Data-Analytics

- Performed data cleaning and preprocessing using Python, Pandas, and NumPy. Performed **Exploratory Data Analysis (EDA)** on a retail sales dataset using **Python, Pandas, NumPy, Matplotlib, and Seaborn**.
- Cleaned and preprocessed data by handling missing values, removing irrelevant columns, and preparing datasets for analysis.
- Analyzed customer purchasing behavior across **gender, age group, marital status, occupation, state, and product categories**.
- Created data visualizations to identify sales trends, customer preferences, and business insights.
- Identified **married women aged 26–35 years** from **Uttar Pradesh, Maharashtra, and Karnataka** as the highest-value customers, with **Food, Clothing, and Electronics** as the top-selling categories.

Power BI Sales Dashboard

- Developed an interactive Power BI dashboard to analyze sales performance and business metrics using the Madhav Enterprise dataset.
- The dashboard provides insights into revenue, profit, customer behavior, product performance, and regional sales through dynamic filters, KPI cards, charts, and slicers.
- Applied Power Query for data cleaning, DAX for calculated measures, and data modeling to create an efficient reporting solution that supports data-driven decision-making.
